

SPLICING TAPE

Conversource delivers a full range of splicing tapes in the sizes you need to keep your presses running. Call us to help your team select the right splicing tapes to improve your processes & your profits.

3M8387

3M SPLITTABLE FLYING SPLICE (Double-Sided)

3M's 8387 Excellent choice for flying splices at higher speeds.

- Optimizes adhesion on your most challenging substrates
- Reduces fiber contamination and tab debris
- Highly visible during conversion
- Saves you clean up time and money

3M9737R

3M SPLICING TAPE (Double-Sided)

3M's 9737 Ideal for high-speed flying splicing & zero speed splicing applications. High-tack, versatile adhesion bonds well to kraft, coated papers, as well as plastic. Temp resistance High. Moisture resistance High. (Red or Clear)

3M SUPER BOND FILM TAPE (Single-Sided)

3M's 396 Transparent with rubber adhesive provides excellent adhesion to low energy surfaces.

C228

PVC SPLICING TAPE (Single-Sided)

C221 Thin strong film tape coated with a high performance adhesive, chosen for its high shear strength. Many press operators prefer red for visually following the splice through the press. (CLEAR or RED)

PERFORATED SPLICING TAPE (Single-Sided)

C229 Clear and specifically designed for splicing cross-perforated webs.

tesa 4970

SILICONE SPLICING TAPE (Single-Sided)

C228 Special formulated adhesive for adhering to silicone coated surfaces. (CLEAR, BLUE or GREEN)

TESA SPLICING TAPE (Double-Sided)

tesa's 4970 Double-sided filmic tape with high-adhesion for general splicing purposes. It is also used on Flying Butt Splicers. (WHITE with Mustard Yellow Liner)

tesa 4313

TESA KRAFT PAPER TAPE (Single-Sided)

tesa's 4313 Brown kraft paper backing with a silicon free release coat and an adhesive system without solvents. Ideal for folding carton and other heavy substrates.
